To whom it may concern,

I'm proud to provide this letter of recommendation for Andrew Siew as he continues his career as a software engineer. This summer I was Andrew's manager as well as mentor for the Naveego Internship Program.

Andrew showed great initiative diving into his first front-end sprint task. He is a quick learner evident by his understanding of React and Redux, as well as Redux Sagas - which are an advanced concept to master. Andrew also chose to take on a very high-leverage task which left a lasting impact on front-end component development. He set up Storybook which documents and provides a much faster iteration lifecycle for the entire engineering team. His decision shows excellent judgement for a junior engineer.

Not only is Andrew talented on the front-end, but he also worked on making multi column family writes to Cassandra atomic in C# / .NET Core along with some devops scripting in Golang. In each of these tasks, Andrew's technical skills for writing clean and maintainable code covered by unit tests were impressive.

Andrew is an excellent addition to any team not only for his skills, but for his positive personality in the office. Feel free to contact me via the email or phone number below if you would like more details about Andrew. I'm more than happy to extend upon on my recommendations.

Best,

Chris Cerk
